Inspired by the company's most loved products, Atlas 46's Yorktown Tool Roll™ is the ultimate pouch for tool organization and transportation across any industry. Backed by Atlas 46's Lifetime Guarantee, the pouch provides maximum accessibility, durability and flexibility for its users, regardless of their needs or profession.

The tool roll gets its name from The Siege of Yorktown, which was a combination of American and French forces, resulting in a victory that initiated peace negotiations and eventually led to the independence of America. Much like the battle, the Yorktown Tool Roll™ is the culmination of two great forces, combining two of Atlas 46's most popular products into the ultimate tool roll pouch.

Generously sized pockets provide space to store a variety of tools, while the Quick Roll System allows for better storage and mobility. It's also the only tool roll with detachable pockets for even greater customization, making this product the perfect holiday gift for anyone in the construction, carpentry, DIY, electrical and maintenance industries.

"When it comes to simplifying tool access and organization, this tool roll sets the standard to beat," said customer Kenneth Harp. "The Yorktown Tool Roll™ is very convenient and so far, seems tough as nails."

The tool roll pouch's success has even led to the creation of other popular products such as the new Yorktown™ Quick Detach Tool Roll and the Yorktown Beast Quick Detach Tool Roll, both of which optimize the qualities of the original Yorktown Tool Roll™ system while providing further specialization and versatility.

The Yorktown™ Quick Detach takes tool rolls to the next level, including four spacious, quick-detach pockets that can be removed from the base simply by pulling the quick release tabs. This new evolution of the original Yorktown still offers the same great wrench/multi-purpose tool slots on the back of the roll, as well as the quick roll function. For larger tools, The Yorktown Beast offers even more space, adding seven

inches to its predecessors to hold anything and everything needed to get the job done and withstand even the harshest of job sites.

Each model comes in a variety of colors and sizes, making it the ideal companion piece for those needing quick and easy access to a large variety of tools and accessories.

"We're committed to producing the highest quality of goods possible and the Yorktown Tool Roll™ is something we are especially proud of," said Brian Carver, president of Atlas 46. "Our gear is built to be as reliable and durable as the professionals that depend on them every day, and we understand the importance of providing our customers with not only a lasting product, but also one that won't fail when under the stress of the job it was intended for."

For more information on the Yorktown Tool Roll™, Yorktown™ Quick Detach Tool Roll, Yorktown Beast Quick Detach Tool Roll or other Atlas 46 products, visit www.atlas46.com.

Atlas 46

With locations in Fenton, MO and Hillsboro, IL, Atlas 46 designs, develops, and manufactures innovative, premium workwear and gear for the construction, carpentry, electrical, maintenance, off-roading, DIY, and woodworking industries. The company was established in 2013 by founder and owner John Carver and is well-known nationally and internationally for its innovative work-gear and patented system that allows users to arrange and rearrange pouches based on their needs.
